Outcrop overview

Unit 3: Marl member

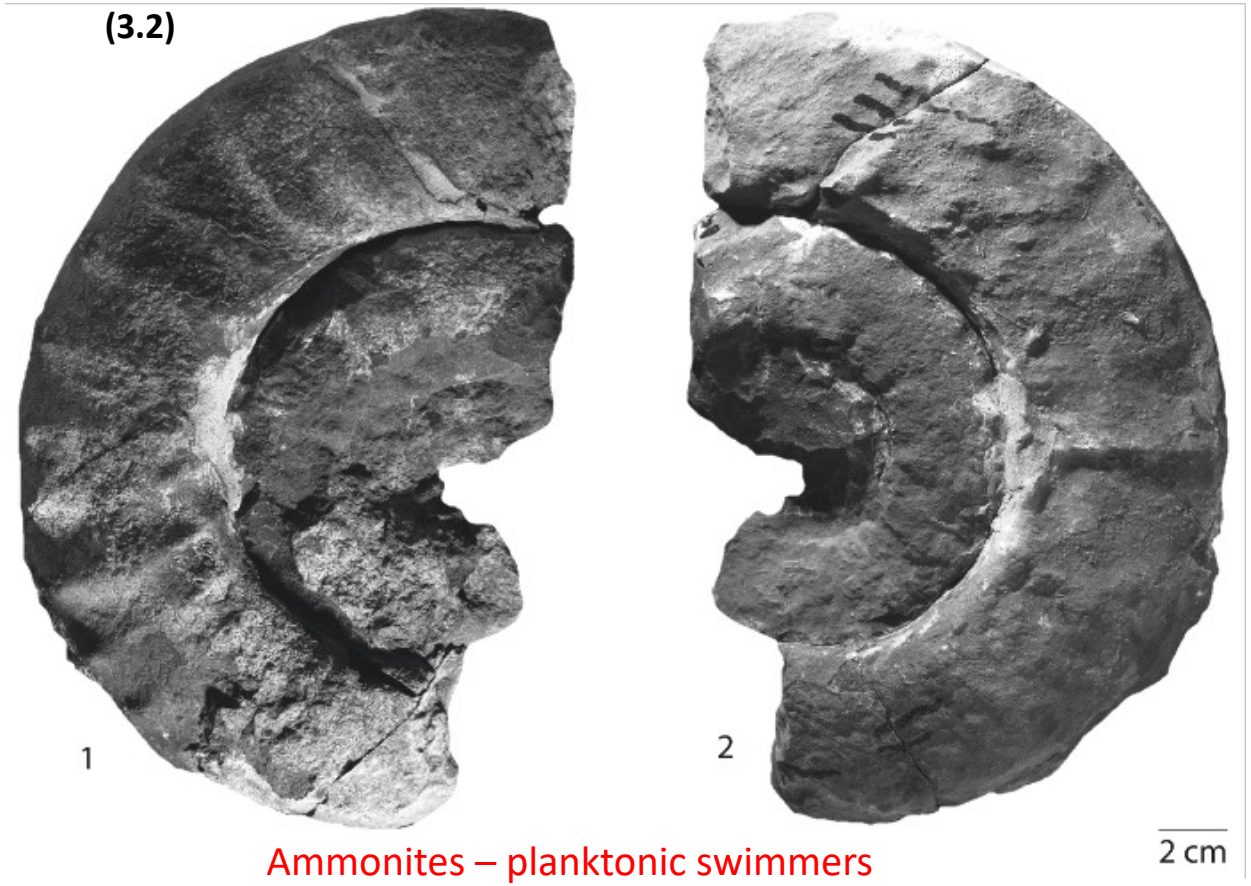

Study the following images.
What were depositional processes and environment for this unit?

What is the lithology here?

(3.2)

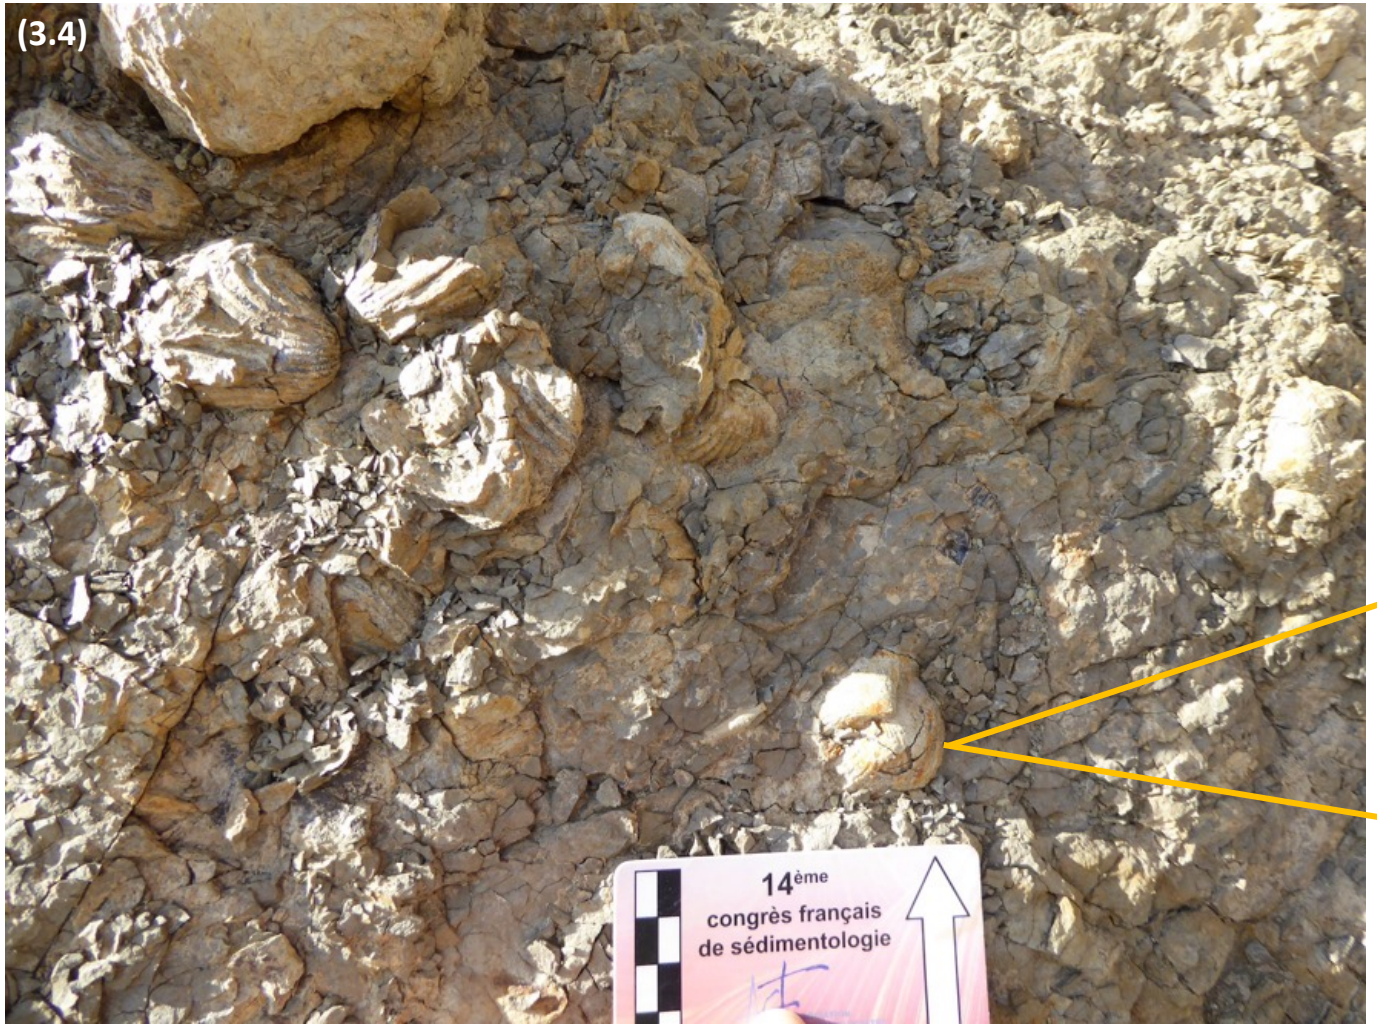

Ammonites – planktonic swimmers

(3.3)

Brachiopods – benthic suspension feeders

What are these fossil groups?
What do they tell us about environmental conditions?

What are these fossil groups?
What do they tell us about environmental conditions?

Pholadomya bivalve: whole fossils, preserved articulate – low energy setting, suspension settling of clay – outer ramp
