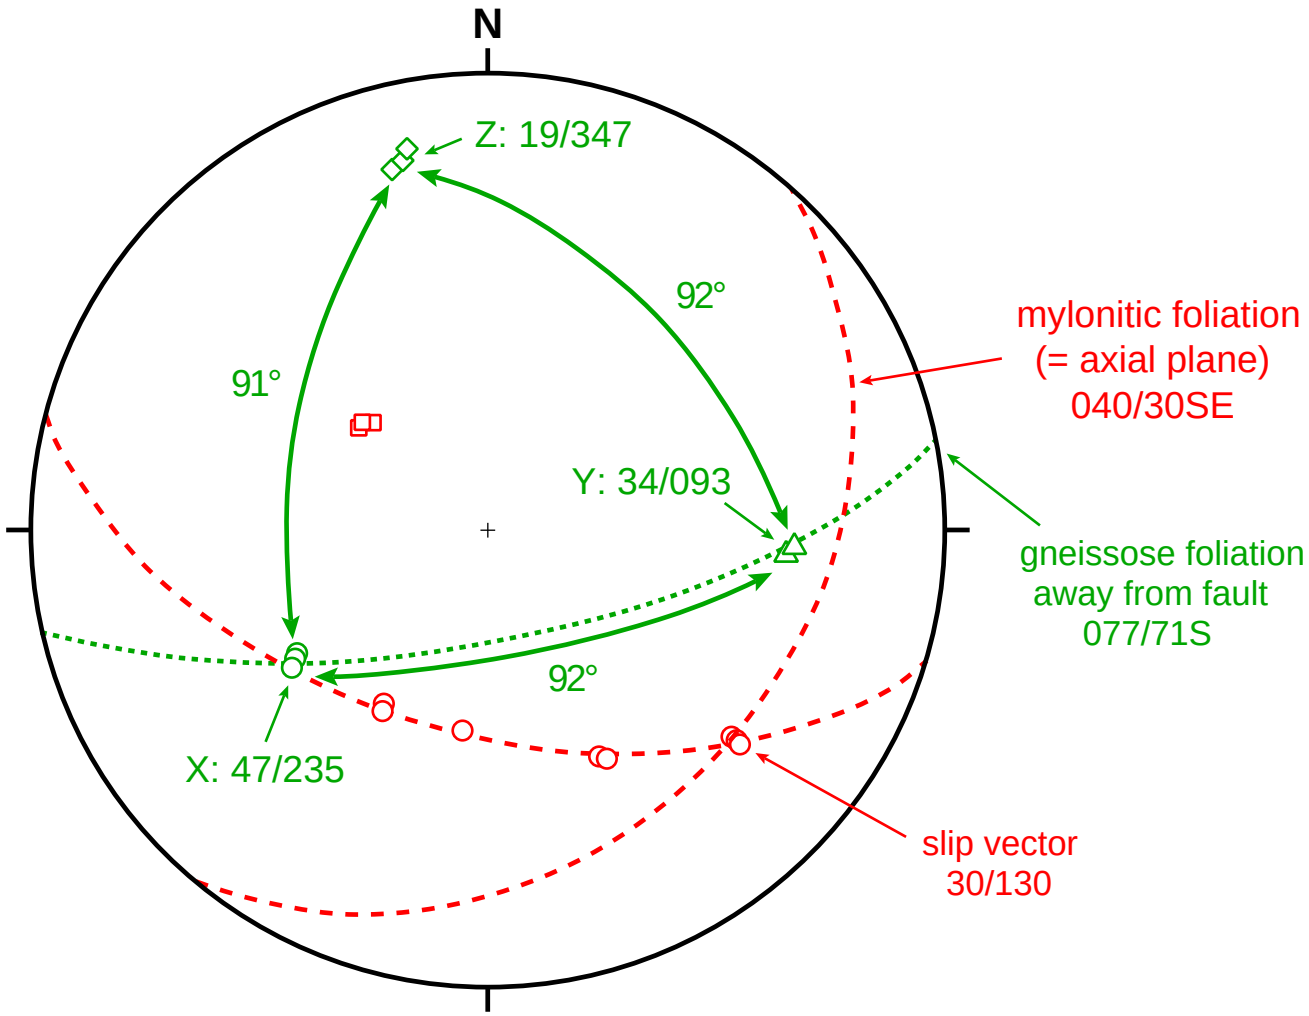
TARSKAVAIG BAY

GEOMETRY OF THE STRUCTURES IN THE GNEISS

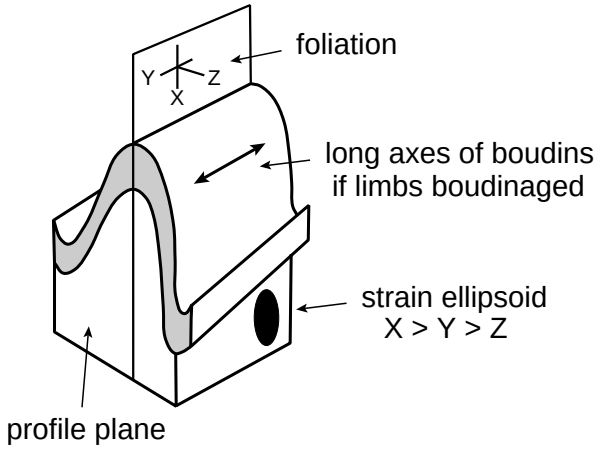


Data

- ◇ poles to gneissose foliation
- ○ mineral elongation lineation (away from fault)
- △ boudin necks
- ▫ poles to mylonitic foliation
- ○ mineral elongation lineation (towards fault)

Strain ellipsoid

ε_1 = X (mineral elongation lineation)

ε_2 = Y (boudin necks)


ε_3 = Z (pole to foliation)
