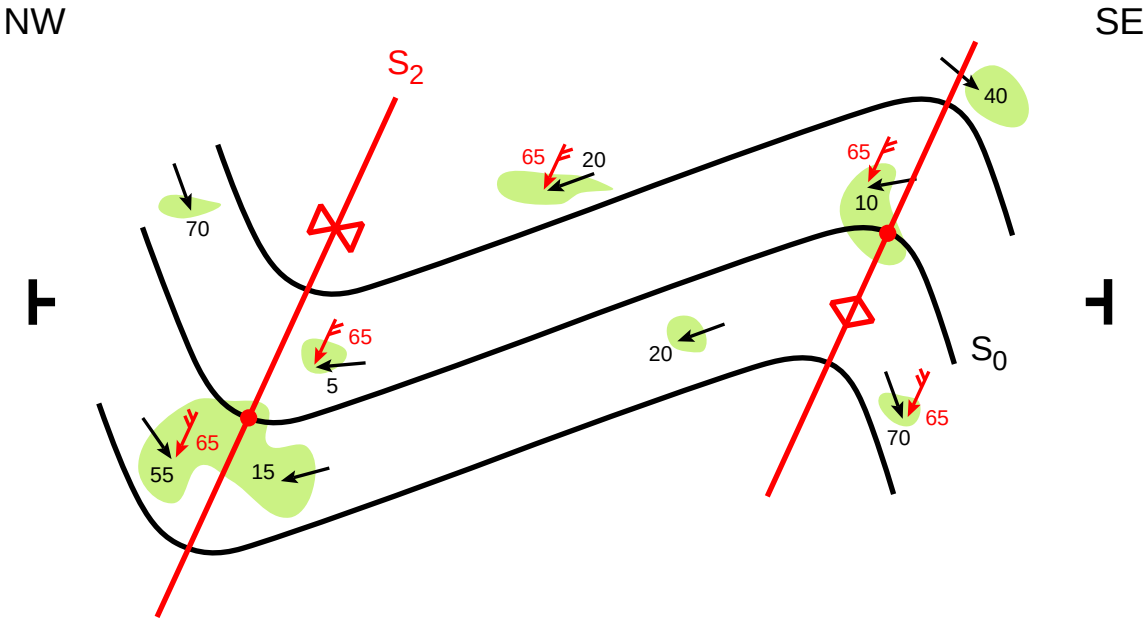
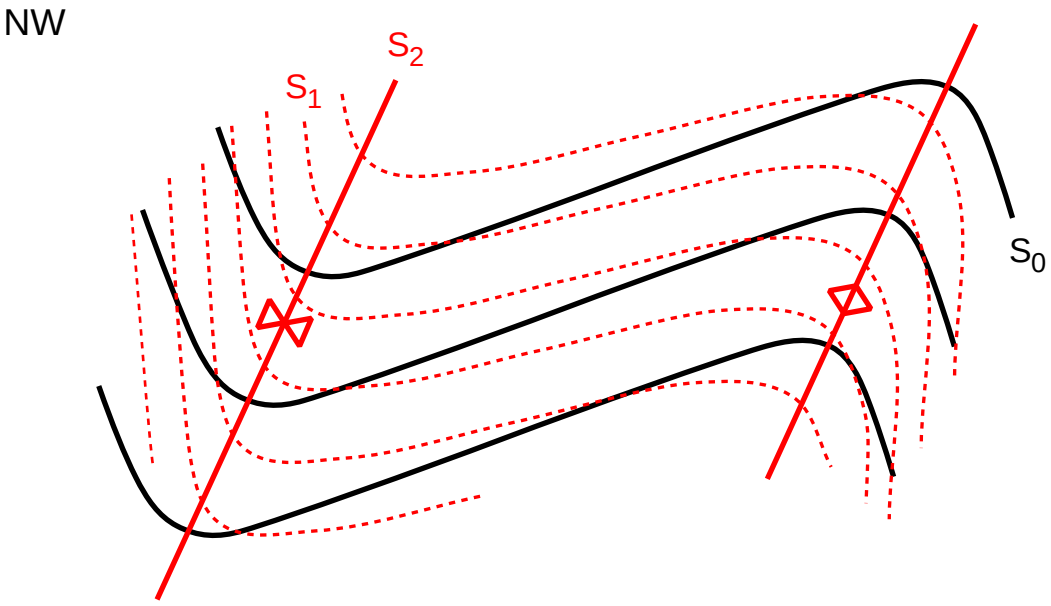
DOWN-PLUNGE SECTION EXERCISE

Profile plane (150/55SW) section





Note that the position of the axial trace to the folded S_1 is shifted with respect to that of the folded S_0 but that it is in the same orientation. The shifting is due to the different orientation of S_0 and S_1 prior to D_2.

Scale 1: 10000
(vertical scale = horizontal scale)

45 apparent dip of S_0

45 apparent dip of S_2
(tick towards antiform)

symmetric minor F_2 observed
