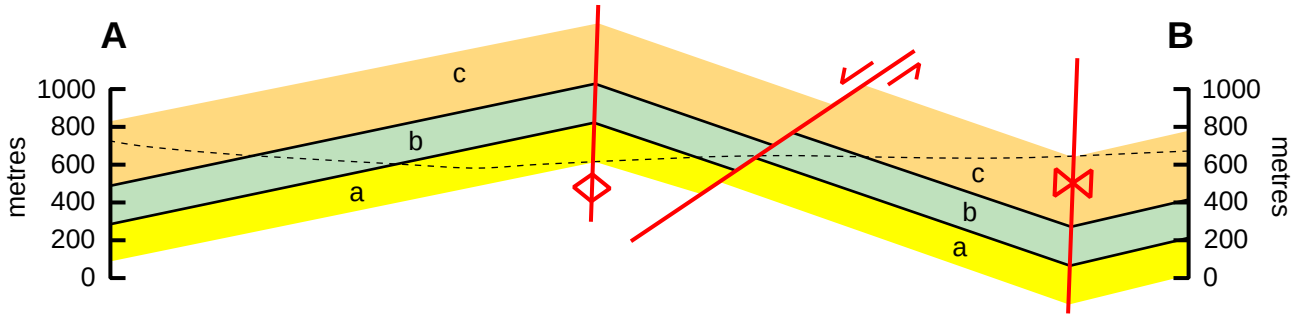
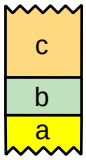
FOLDS AND FAULTS EXERCISE

Vertical cross-section along line A-B (000/V)





Sandstone
Mudstone
Grit

horizontal scale = vertical scale

It is not possible to say, based on the map, which came first - folding or faulting

Fold geometry

Limbs : 100/14N and 100/19S
Fold axis : 0/100
Bisector : 100/88N (≈ axial plane)
Interlimb angle : 147°

Fault geometry

Orientation : 090/34N
Slip vector : 34/000 ; 120 m (normal)
