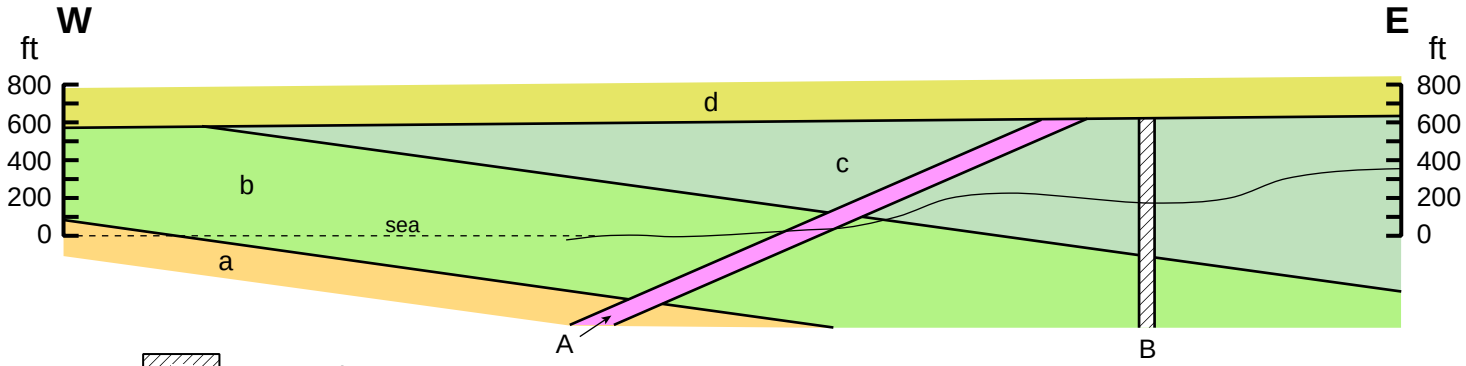
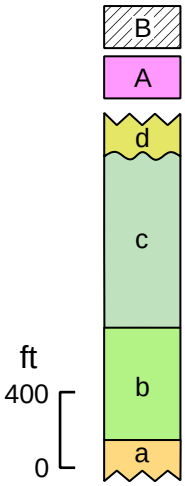
Fault plane section (115/V) looking north





ore vein

dolerite

sandstones : ~ 200 ft min

mudstones : ~ 900 ft min

limestones : 584 ft

conglomerates : ~ 200 ft min

contours in feet

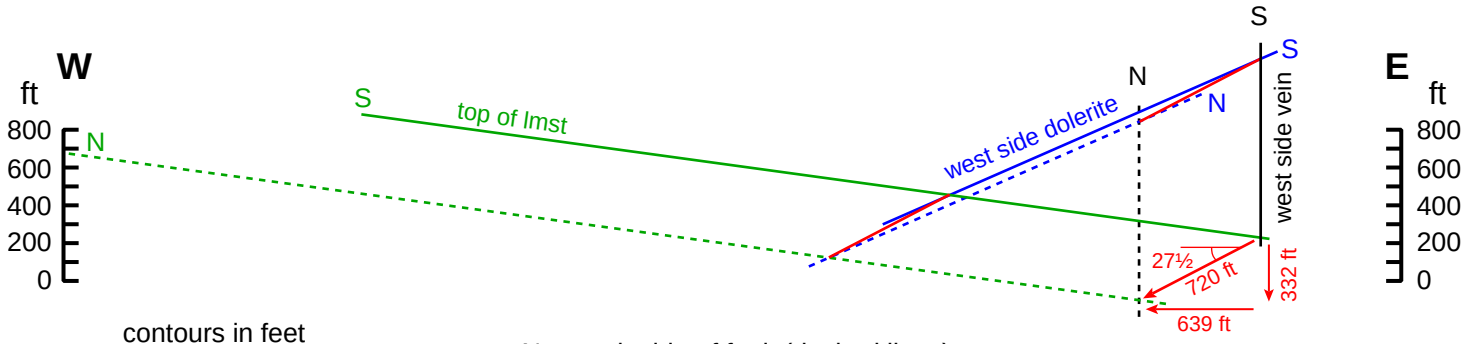
0 1000 ft

vertical = horizontal scale

(1 mm = 40 ft)

1 mm = 40 × 12 inches
= 40 × 12 × 25.4 mm
= 12192 mm
1 : 12192

Juxtaposition section (115/V) to determine fault slip



contours in feet

0 1000 ft

vertical = horizontal scale

N = north side of fault (dashed lines)

S = south side of fault (solid lines)

using vein / top of lmst intersection

(same answer obtained using vein / dolerite intersection or dolerite / top of lmst intersection)

Faulting

Fault plane : 115/V

Slip vector : 27½/295, 720 ft

Dip-slip : 332 ft (down to N)

Strike-slip : 639 ft (sinistral)
